

PHANTOM MOTORIZED RETRACTABLE SCREENS

FOR EXTERIOR SHADING ON WINDOWS & LARGE OPENINGS

CREATE SHADE AND ELIMINATE GLARE AT THE TOUCH OF A BUTTON

Phantom's motorized screens with the cable guide system are customized to blend perfectly with any type of architectural design and décor.

MOTORIZED SCREENS IDEAL FOR WINDOWS, LARGE OPENINGS AND MORE

Phantom's motorized retractable screens with the cable guide system reduce solar heat gain and glare on large windows, glass walls, covered outdoor spaces such as patios, and various openings including open corners without posts. The shades lower and lift along a cable guide system to prevent them from swinging in breezy conditions. The self-tensioning technology helps keep the cables taut in varying outdoor conditions, reducing the need for maintenance. Best of all, they can be mounted to the exterior of the building making them 7X more effective at keeping spaces cool compared to interior shades.*

FEATURES & BENEFITS

- Retracts vertically and completely out of sight when not in use to restore fully open views and maintain curb appeal
- Mounts to the building exterior - 7X more effective at reducing building heat gain than interior shades
- Features self-tensioning technology that helps keep the cables taut in varying outdoor conditions, reducing the need for maintenance
- Operates with wall mounted or hand-held remote controls
- Available with automated environmental control options including sun and wind sensors
- Helps prevent weighted slidebar from swinging in breezes with slidebar tensioned cables and mounting brackets, which can be attached to a horizontal or vertical surface
- Allows for integration with home automation systems, smart phones & tablets
- Includes a professional installation by factory trained installers
- Industry leading Limited Lifetime Warranty**
