ANCIENT TRADITION, MODERN PERFORMANCE.

Ignite By Thermory Is Setting The Cladding World On Fire.

Hundreds of years ago, Japanese woodworkers discovered that they could prolong the life of wood by charring the exposed surface. This process, called shou sugi ban, created enviable, stunning results that are still highly in demand today.

Traditional shou sugi ban is beautiful, but using it can be problematic. Most shou sugi ban leaves only the charred surface resistant to rot. Ignite provides the look of shou sugi ban, with durability all the way to the core. And unlike charred wood, Ignite has no messy residue.

Ignite by Thermory offers the shockingly realistic look of charred wood, without the flames.

Ignite Brushed Cladding

IGNITE by THERMORY mimics the traditional look of shou sugi ban with the added benefits of thermal modification.

▶ Stained, brushed and embossed to recreate the texture of charred wood without the mess and residue

▶ Thermally modified spruce for 25+ years of rot resistance

▶ High level of dimensional stability

▶ Consistent appearance from batch to batch

▶ Highly controlled process ensures reliable results every time

ROT RESISTANCE
25+ years of rot resistance

STABILITY
Reduced absorbency

TERMITE
No bugs allowed

SUSTAINABLE
Responsibly harvested and chemical-free

THERMALLY MODIFIED
Naturally enhanced using only heat & steam

GET THE LOOK. DITCH THE TORCH.

Ignite by Thermory creates its signature dragon scale pattern by embossing, brushing and tinting thermally modified spruce. Unlike modern shou sugi ban, which is often created by hand with a torch, Ignite is created with a deceptively flame-free process. It is also available with only the brushed texture.
